Master's student in Computer Science and Artificial Intelligence at Boston University with a B.S. in Graphic Communication (UX/UI concentration, Computer Science minor). Experienced in software engineering, project management, and platform testing with a strong foundation in design tools, programming languages, and product development. Passionate about creating user centered solutions that bridge design and technology.

EDUCATION

Boston University Sept 2026 – Present
Master's Student — Computer Science and Artificial Intelligence

California Polytechnic State University, San Luis Obispo Sept 2021 – June 2026
Bachelor of Science — Graphic Communication
Concentration: User Experience/ User Interface
Minor: Computer Science
Awards: Dean's Honor List

EXPERIENCE

Centific – Redmond, WA June 2023 – May 2026
Vendor (Microsoft Intern)
Platform Testing
- Executed daily function tests across four different user accounts using structured test checklists
- Logged, reproduced and documented bugs for engineering teams to improve platform stability

Summer 2024 - Software Engineering Intern
- Contributed to the development of an AI-powered chatbot feature into a legal-tech platform designed to assist lawyers with case management.
- Implemented a safety feature that screened for abusive language, including sexual content, threats of violence, and self-harm references.

Summer 2023 - Project Management Intern
- Designed layout and wireframes on Figma for an auto-generated PowerPoint generation tool that transformed live data into presentation decks
- Selected and implemented appropriate data visualizations to clearly communicate insights
- Collaborated with engineers and product managers to ship production ready features

Geltor – Emeryville, CA August 2022 – September 2022
Materials Engineering Intern
- Tested physical properties of competitors products using various lab equipment
- Collected, organized, and analyzed data to draw conclusions and make suggestions on areas of improvement
- Designed and executed experimental procedures with rigorous documentation

SKILLS

Technical Skills
- Adobe Creative Suite: Illustrator, Photoshop, InDesign, Acrobat
- Microsoft Office Suite and Google Workspace
- Programming: Python, C, Java, HTML, CSS

Soft Skills
- Collaborative team player
- Adaptability
- Strong work ethic
- Creative
- Problem solving
